SalesStream *Guide*

Marketing and Business Operation Support
Nov 2010

Objective

A Sales Management Tools that can help to

- **Monitor & Track Sales Pipelines**
- **Forecast Sales Contract & Revenue**
- **Monitor Sales Activity**

Sales Stream Features

1. Sales Pipelines
   - Maintain Sales Pipelines breakdown by Solution Portfolio
   - Revenue Plan
   - Sales Process Stage
2. Pipeline-based Sales Activity
3. Customer Contact Database
4. Reporting
   - Pipeline Summary per BC Group and by Solution Portfolio
   - Pipeline Detail/Monthly per BC Group and by Solution Portfolio
   - Win-loose Analysis
   - Sales Activity Report

Sales Stream Benefits

1. For BC
   - Help BC to plan and monitor their pipelines in achieving their target
   - Assurance to get support from Portfolio and Top Management
   - Allow BC to manage their time on the opportunities that they are currently working on
   - Increase BC and Pre-sales collaboration as a team to work together for the opportunity

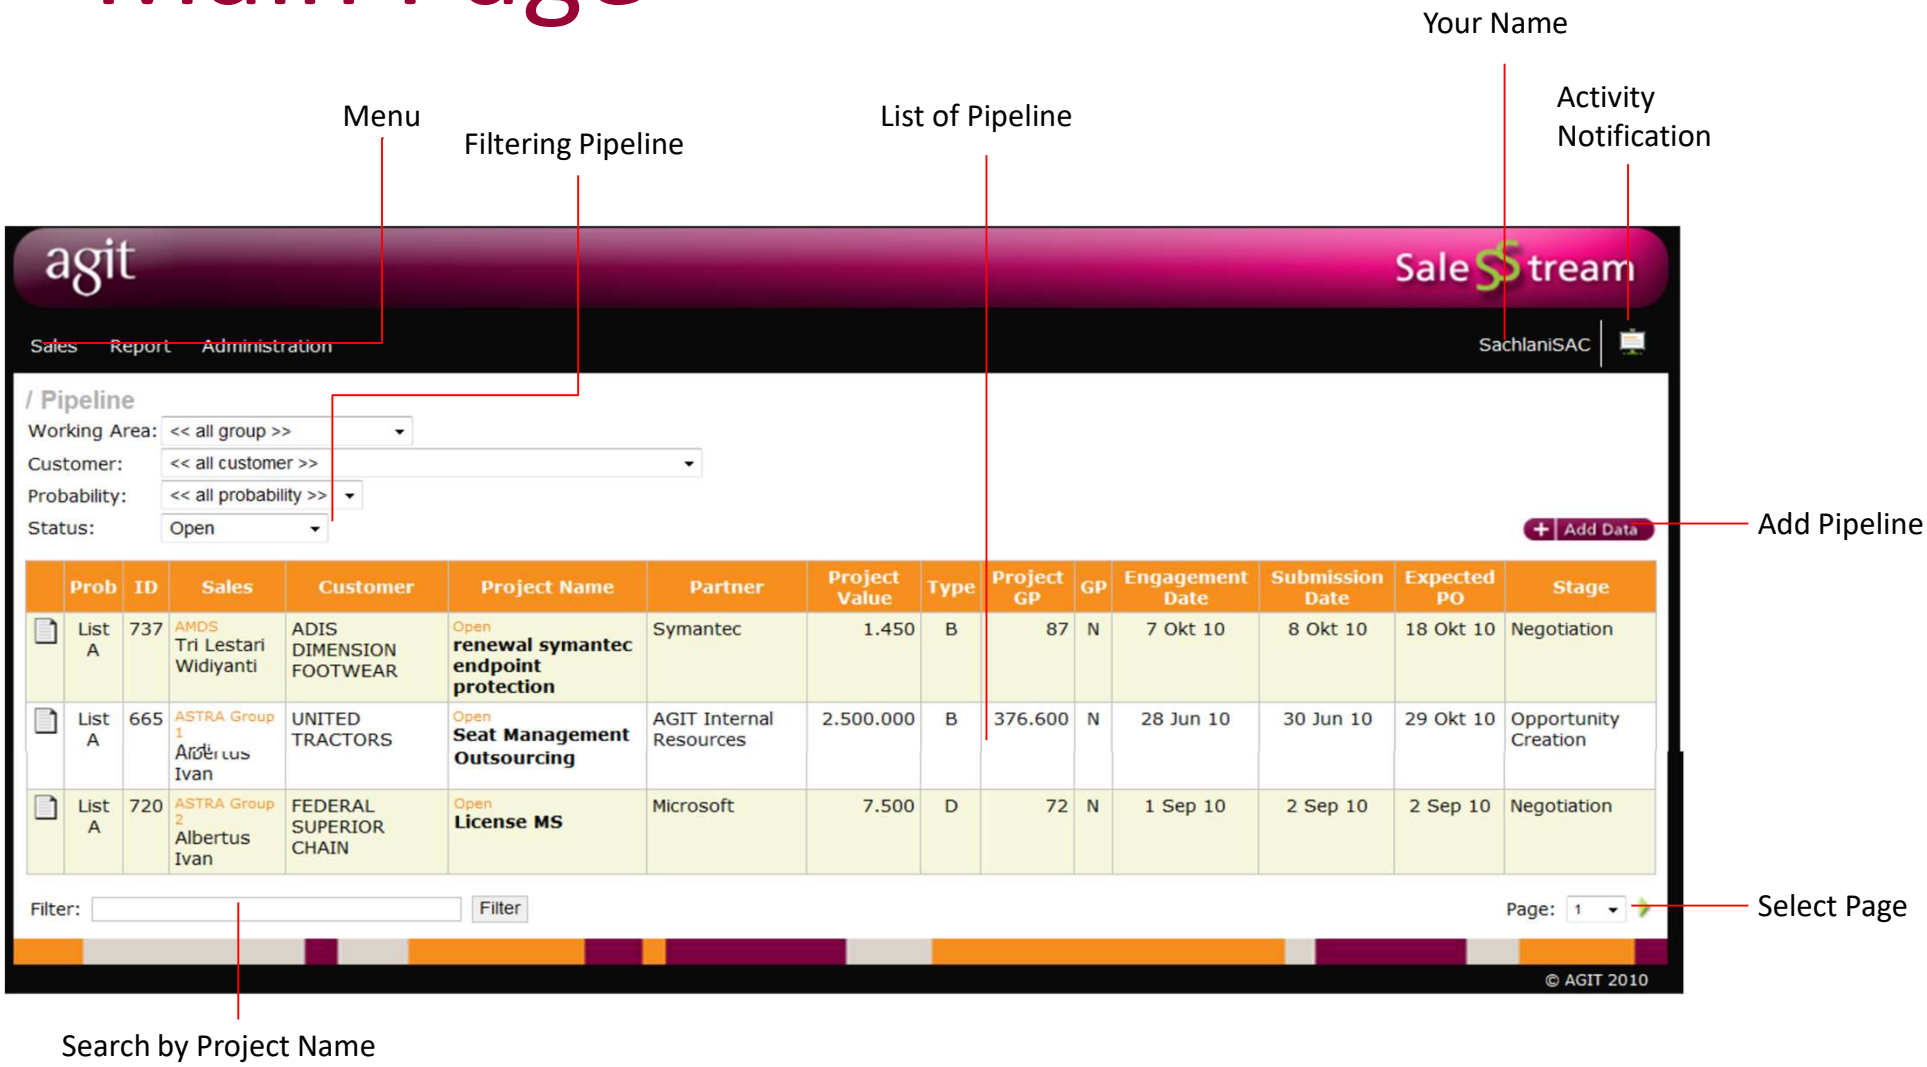

2. For Management
   - Get better pipelines consolidation and monitoring
   - Online & Timely information
   - Central point for BC Managers to manage their team activities

Getting Started

Pre-requisite

- Sales Stream is using single logon, so you must have a domain account in AGIT (contact IM Dept)
- Your domain account should had been registered in Sales Stream (contact Administrator)
